Claude sits between your brief and ElevenLabs; one song costs about ₹55 to ₹89

music process architecture · as run in this session

Nothing is charged until the run controller confirms the lyrics, 60-second length and v2.5 on the ElevenLabs node. Takes are downloaded as soon as they finish, since the MP3 links expire after 2 hours.

Cost per song and per batch, in rupees: Costing

Costing

One song with 3 takes costs about ₹55 to ₹89: ₹40.5 for ElevenLabs plus an estimated ₹14.5 to ₹48 for Claude. Rupee figures use about ₹96.5 per US dollar (October 2026); check the current rate before budgeting.

Item	ElevenLabs credits	ElevenLabs ₹	Claude ₹ (estimate)	Total ₹
1 take (60s)	1,400	₹13.5	included in the song's run	₹13.5 + Claude
1 song, 3 takes	4,200	₹40.5	₹14.5 to ₹48	₹55 to ₹89
1 topic × 4 styles (Rock, Pop, Rap, Bollywood)	16,800	₹162	₹58 to ₹193	₹220 to ₹355
4 remaining topics × 4 styles	67,200	₹648	₹232 to ₹772	₹880 to ₹1,420
Spent so far (Photosynthesis pilot)	about 50,400	about ₹486	not measured	about ₹486 + Claude

ElevenLabs figures are what the runs actually charged: 1,400 credits per 60-second take on Music v2.5. A failed take is listed at 1,400 credits; whether it is refunded is unconfirmed. Longer songs should cost more, roughly in proportion to length.

Claude figures are estimates at Claude Opus 5.5 API rates: $4 (about ₹386) per million input tokens, $20 (about ₹1,930) per million output, $0.20 (about ₹19) per million cached input. One song takes about 8 tool calls: writing the lyrics and brief, setting up the node, checking it, running, polling and downloading. The low end is a fresh, short conversation; the high end is a long one like this, where every call re-reads the history. Claude usage was not metered per song, so these are not measured. On a Claude subscription plan (Pro, Max, Team), this usage counts against the plan's limits instead of being billed per song.
